This document summarizes the contributions of each team member up to the POC Demo. The time period of interest is the time between the beginning of the term and the POC demo.

## 1 Demo Plans

We will be demonstrating a working prototype of the Plutos application, with the following base functionalities:

- Upload a receipt image
- Pass the image through the machine learning (ML) model to extract information and categorize items
- Display the extracted information to the screen

These features would serve as the base for the product and to demonstrate the feasibility of the project.

## 6 Commits

[For each team member how many commits to the main branch have been made over the time period of interest. The total is the total number of commits for the entire team since the beginning of the term. The percentage is the percentage of the total commits made by each team member. —SS]
